Icon description

The icons are designed to provide key product information in an intuitive and clear way.

Each symbol has a unique meaning that symbolizes important features of the systems, such as their functionality, materials or special attributes.

This allows you to quickly and easily identify the most important attributes of the products offered, making it much easier to navigate through the catalog.

Construction type

The type of product construction, specifying the materials used, such as:

- **Polyvinyl chloride (PVC)**
- **Aluminium (ALU)**
- **Medium-density fibreboard (MDF)**
- **Polyurethane (PU) foam**
- **Polyethylene (PE)**
- **Beech wood**
- **Fiberglass**
- **Polycarbonate (PC)**
- **Expanded Polystyrene (EPS)**
- **LED**
- **LCD**

Material for print type

The type of material used in production, such as **textiles** or **PVC**, plays a crucial role in determining the product's durability, flexibility, and suitability for various environments and applications.

Printing method

The type of printing used in the product, such as sublimation or solvent, which affects the quality and durability of the graphics.

- **Sublimation**

Sublimation is a printing technique in which the dye transfers into the structure of the material, providing durable, intense colors and detailed designs, ideal on polyester fabrics. The print is resistant to fading and abrasion.

- **Solvent**

Solvent printing uses solvent-based inks for high durability and weather resistance, ideal for applications on materials such as PVC. Prints are resistant to fading, moisture and damage.

Construction mounting type

Free-standing
A free-standing product that does not require additional attachment to the wall or other structural elements.

Wall-hung
The product is designed for wall mounting, which saves floor space and increases design possibilities.

Suspended
The product is designed to be hung, ideal for display in spaces where the use of height is important.

Lighting

Edge lighting
Edge lighting mounted in the product frame, which adds elegance and a modern look to the product.

Back lighting
Illuminated by led strips mounted on a light curtain placed behind the print.

adsystem specials

Bestseller
This is the most popular product among our customers, highly recommended for its reliability and performance.

Exclusive design
The product features a distinctive and exclusive design, crafted to stand out and offer something unique.

Patent
The product is protected by adsystem patent, which proves its innovation and exclusivity in the market.

Printings

All-sided print
Can be printed on all sides of the product for full personalization and visibility from any perspective.

Single-sided print
Single-sided printed product, ideal for applications where visibility is needed from one side only.

Double-sided print
A product with double-sided printing, allows the use of two different graphics, one on each side.

Silicon Edge System (SEG)
Graphic mounting system, allows the material to be easily and aesthetically secured to the frame by fitting the rubbers into the recess.

Washable printing
The product is made of materials that can be washed in the washing machine, which allows you to keep it clean.

Zipper
The product is equipped with a zipper that makes it easy to close and open for convenient use from one side only.

Assembly

Tool-free assembly
Allowing the product to be set-up quickly and easily without additional equipment.

Allen-key assembly
Included allen key allows for easy and quick installation of the product.

Pneumatic/self-folding
A product with a pneumatic or self-folding mechanism - one move is all it takes to fold and unfold the system.

Multimedia

Android
Product compatible with Android, which allows easy integration with mobile devices and applications.

Touchscreen
The product features a touch screen for interactive operation and easy management of functions.

Built-in memory
Built-in memory in the product, allowing you to store data or settings without the need for external media.

Bluetooth
Bluetooth technology allows for the product to be connected wirelessly with other devices.

Wi-Fi
Wi-Fi module integrated into the product for wireless network connection and remote management.

Size parameters

Profile width
The width of the product profile, important in assessing its appearance and construction stability.

Diameter
It determines the diameter of the product's pipe, which ensures its weight or stability.

Packaging

Softbag included
Product comes with a carrying bag, made of soft material, for easy handling and protection of the product.

Wheelbag included
The product comes with a wheeled carrying bag, making it easy to carry and transport for long distances.

Miscellaneous

Reusable construction
A reusable design that can be used for many seasons, only replacing the print with graphics when needed.

Constant pressure
Product is designed to maintain a constant pressure for stability and reliability during use, without the need to inflate.

Modular
Design that allows combination and customization of individual systems. Several products can form a synchronized set.

With shelf
The product is equipped with a shelf, allowing you to store additional items.

Outdoor & indoor friendly
The product is designed for both outdoor and indoor use and is resistant to various weather conditions.

Customization available
Possibility of full personalization of the product, tailored to individual customer needs (e.g. dimensions, shape, color).

Battery
The product is equipped with a battery, which allows use without constant power supply.

Display walls

Advertising walls are professional and proven tools that effectively promote a company and its products through the presentation of large-format graphics. They provide unlimited possibilities to present a brand, product or idea in any place and situation. Display walls of this type are undoubtedly one of the most effective portable exhibition systems. The prints are made on textiles, which allows you to easily change the graphic design according to your needs. Thanks to tool-free assembly, anyone can handle their installation, regardless of experience. In addition, the prints are eco-friendly, made using the sublimation method, which ensures durability and high color quality.

How can it be used?

- **Photo backgrounds**
- **Conference backgrounds**
- **Decorations for offices and service spaces**
- **Exhibition space**

Perfect fit for sectors like:

➞ **Companies and corporations:** increasing brand visibility at industry events.

➞ **Small and medium-sized businesses:** an effective and portable marketing solution.

➞ **Advertising and marketing agencies:** a tool for promotional campaigns.

➞ **Event organizers:** attractive exhibition spaces.

➞ **Educational and cultural institutions:** presentation of activities and exhibition of products.

➞ **Freelancers and creative professionals:** backgrounds for photo shoots, recordings, webinars.

Original shapes exhibition systems

Vario textile walls are an innovative and unique solution that stands out from traditional exhibition systems thanks to its unique design and variety of shapes. You can choose from forms such as snail, crown, wave, and many others, allowing you to create absolutely unique arrangements. These walls give you almost unlimited possibilities for creating a space - the only limitation is your imagination. Made of high-quality textile materials, Vario walls guarantee excellent color reproduction and crisp details, which reinforces your brand message.

How can it be used?

- Trade shows
- Conferences and seminars
- Events and promotions
- Showrooms
- Galleries and exhibition spaces

Perfect fit for sectors like:

➞ **Public offices and institutions:** creating unique displays that attract attention and promote activities in public spaces.

➞ **Event organizers:** building memorable, creative booths that stand out from the rest.

➞ **Businesses:** innovatively showcasing products and enhancing brand image at industry events.

➞ **Shopping malls and galleries:** creating compelling displays that engage customers in commercial spaces.

➞ **Educational institutions:** designing original booths for educational fairs, open days and other memorable events.

Lightboxes

Lightboxes are a unique product that can be both a freestanding and hanging advertisement. Printed on one or two sides, the promotional medium can be enhanced with visible LED lighting, which draws attention from a distance. An additional advantage is the ability to change graphics without the use of tools. Lightboxes are highly versatile and can be adapted to different environments and purposes. Textile advertising is a great way to draw your audience's eyes toward your brand.

How can it be used?

- **Trade shows**
- **Conventions & large events**
- **Interior design**
- **Showrooms decor**
- **Retail spaces**

Perfect fit for sectors like:

➞ **Large enterprises and brands:** boosting visibility and brand presence at major events.

➞ **Small and medium-sized businesses:** cost-effective and adaptable advertising solution.

➞ **Advertising and marketing agencies:** a tool for innovative promotional campaigns.

➞ **Event planners:** designing visually appealing and functional display areas.

➞ **Retail stores:** enhancing in-store displays and attracting customers.

➞ **Interior designers:** providing customizable and impactful decor options.

Textile frames

Advertising frames in the form of textile panels are an innovative solution that will allow you to convey your advertising message in a modern, impressive way and, importantly, without the need for complicated tools. These frames are designed to be both visually eye-catching and highly functional, making them ideal for a variety of settings. Thanks to an innovative mounting system, it only takes a few moments to attach the frame to the wall, ceiling, or other surface of your choice, providing smooth integration into any environment.

How can it be used?

- Retail spaces
- Home decor
- Office interiors
- Exhibitions and galleries
- Trade shows

Perfect fit for sectors like:

➡ **Retailers and store owners:** enhancing visual merchandising and in-store displays.

➡ **Home decorators:** adding a modern and stylish element to living spaces.

➡ **Corporate offices:** creating professional and branded environments.

➡ **Event organizers:** setting up impactful and easily changeable signage.

➡ **Art galleries and museums:** presenting artworks or exhibitions in an elegant, modern way.

Counters & tasting stands

Promotional stands are an essential element for a wide range of promotions, tastings, and campaigns, effectively capturing the attention of customers and visitors at trade shows, retail stores, or offices. These stands serve as eye-catching tools that encourage people to engage with the brand's offerings. High-quality printing and visually appealing graphics are key to successful advertising, enhancing the professional image of the company.

How can it be used?

- Promotional events
- Product tastings
- Trade fairs
- Retail stores
- Corporate offices

Perfect fit for sectors like:

➞ **Food and beverage brands:** offering a professional setup for tastings and product demos.

➞ **Marketing teams and brand managers:** enhancing promotional activities and campaigns.

➞ **Retailers and shop owners:** creating engaging in-store promotions.

➞ **Event planners:** provide an attractive central point for promotional events.

➞ **Corporate businesses:** showcasing products and services in a professional manner.

Outdoor advertising

During summer and winter, some of the most helpful promotional tools are tents, columns, gates, deck chairs or flags. In our offer, you will find all these products in many different variants and configurations to suit your needs. All inflatable products are constant pressure, which means you only need to fill them once to enjoy a permanent structure all day long. One-time filling avoids the annoying use of portable power sources that generate unnecessary noise and incur additional costs.

How can it be used?

- Outdoor events
- Festivals and fairs
- Sports competitions
- Beach promotions
- Seasonal markets

Perfect fit for sectors like:

➞ **Event organizers:** creating visually appealing and functional outdoor spaces.

➞ **Sports teams and sponsors:** enhancing visibility and brand presence at competitions.

➞ **Festival planners:** providing durable and customizable promotional setups.

➞ **Retailers and brands:** conducting outdoor promotions with eye-catching displays.

➞ **Hospitality and tourism businesses:** offering branded, comfortable seating and structures for guests.

Roll-up

Roll-ups are one of the most versatile and popular tools for promoting products, services, and events. These portable and easy-to-assemble displays are perfect for creating an instant professional presence in any environment. Whether used at trade shows, in-store promotions, or corporate events, roll-ups provide a large and eye-catching canvas for your brand message. Their lightweight design makes them easy to transport and set up, while high-quality printing ensures your graphics are sharp and vibrant.

How can it be used?

- Trade shows
- Exhibitions
- In-store promotions
- Corporate events
- Conferences and seminars
- Product launches

Perfect fit for sectors like:

➞ **Government offices and public institutions:** communicating information and services to the public.

➞ **Event organizers:** providing professional and customizable signage at events and conferences.

➞ **Retailers:** promoting products or sales in-store with attention-grabbing visuals.

➞ **Corporate businesses:** enhancing brand presence at meetings, presentations, and networking events.

➞ **Educational institutions:** displaying information at open days, career fairs, and other academic events.

Multimedia advertising

Advertising screens based on LED technology are becoming an increasingly common element in the promotion of products, services, and events. Digital series models are a proposal for those looking for bold and modern solutions. This category is not only innovative technology but also universal tools that allow you to expose your content attractively and effectively. Digital media, LED screens, or advertising totems are perfect as an informational part of the office, gallery, or any establishment where people appear.

How can it be used?

- Corporate offices
- Shopping malls and galleries
- Trade shows and exhibitions
- Public spaces
- Entertainment venues

Perfect fit for sectors like:

➞ **Public institutions:** providing clear and attractive information to visitors and the public.

➞ **Art galleries and museums:** offering modern solutions for interactive displays and information.

➞ **Businesses and corporations:** enhancing communication and brand visibility in offices and public spaces.

➞ **Retailers and shopping centers:** creating dynamic and engaging advertising displays.

➞ **Event organizers:** delivering impactful visuals at conferences, exhibitions, and shows.

Accessories & advertising stands

Accessories and brochure holders are essential components that improve and complete your promotional displays, ensuring that your marketing materials are organized, accessible, and presented in the best possible light. This category includes not only brochure holders and display accessories, but also a variety of practical items like towels, blankets, pumps, and lights designed to support and complement your promotional setups.

Brochure holders are available in a range of styles and configurations, making it easy to create a professional presentation. Additionally, towels and blankets can be customized with your branding, serving as both functional items and promotional giveaways at events.

Pumps and lights are essential tools for maintaining and improving inflatable displays and other promotional systems, ensuring that they are always properly inflated and ready for use.
